

# AI Questions for Elders & Church Boards

Oversight questions for faithful governance

**Authority:** Who approves the use of new digital tools, and how are those decisions communicated?

**Privacy:** What ministry data exists, where is it stored, and who has access to it?

**Formation:** How might these tools subtly shape staff behavior or congregational expectations?

**Risk:** What would be the pastoral cost if a tool failed, leaked data, or was misused?

Boards are called to protect trust as much as efficiency.
