

# Human-in-the-Loop Ministry Checklist

Safeguarding pastoral responsibility in digital systems

- ✓ A named human owner is accountable for every automated system.
- ✓ Congregants can reach a real person when questions or issues arise.
- ✓ AI outputs are reviewed before being shared publicly or pastorally.
- ✓ No system is used in isolation from prayer, Scripture, and communal wisdom.

Technology should extend care—not outsource it.

Halo Heuristic - Ethical Tech & AI for the Church

These resources support discernment and do not replace pastoral judgment, Scripture, or prayer.
